

LUXSYNC

WHERE LUXURY LIVES INTELLIGENTLY

THE ROI OF SMART LIVING

RESIDENTIAL
HOMEOWNERS

A LUXSYNC GUIDE
SMARTER LIVING. MEASURABLE VALUE.

Residential Homeowners

For homeowners planning a first smart-home foundation, improving an existing system, or creating a phased intelligent-living roadmap

Residential ROI is not only a resale calculation. It may include measured operating savings, time recovered from repetitive tasks, reduced service calls, earlier awareness of property issues, and everyday value from a home that is easier to use. LuxSync keeps financial outcomes separate from personal lifestyle value so the decision stays clear.

The Residential ROI Case

Value area	What to measure	Relevant LuxSync capabilities
Energy use	Lighting, climate, and avoidable device runtime	Energy Intelligence, Climate Intelligence, Away
Time and convenience	Minutes spent on repeatable lighting, entry, climate, and device tasks	Welcome Home, Effortless Departure, Goodnight, Gentle Morning
Property awareness	Leak events, response time, second-home checks	Water Watch, Property Pulse, Vacation Mode
Service simplicity	Troubleshooting time, duplicate devices, unsupported ecosystems	SmartThings-compatible foundation, Blueprint planning
Comfort and ambience	Rooms/routines improved and household satisfaction	Intelligent Evening, Cinema, Entertain, Relax
Accessibility	Tasks made easier through appropriate controls and routines	Accessible Living, Night Path

Build Your Baseline

Gather:

- 12 months of energy costs where available;
- household routines and repetitive tasks worth simplifying;
- technology-related service calls, replacements, and troubleshooting time;
- water/property incidents and response time;
- current hubs, voice assistants, locks, lighting, thermostats, sensors, entertainment, and network equipment;
- rooms and priorities for the first phase;
- personal value of convenience, comfort, and accessibility-kept separate from cash savings.

Residential ROI Worksheet

Input	Your value / unit	Reference method
Annual verified energy savings	_____ \$	Weather-normalized baseline minus measured result
Annual time value	_____ \$	Verified hours recovered × your chosen hourly value
Annual avoided service/visit cost	_____ \$	Verified avoided events × cost per event
Risk-adjusted property value	_____ \$	Probability × attributable avoidable cost; show as scenario
Annual recurring cost	_____ \$	Subtract subscriptions/services
Initial investment	_____ \$	Validated product and setup cost
Personal lifestyle value	_____ Describe separately	Do not force comfort or peace of mind into a false cash claim

Choose a First Phase

Start with one or two routines that happen every day and one property-awareness priority. For example:

- Welcome Home + Goodnight;
- Climate Intelligence + Away;
- Water Watch + Property Pulse;
- Accessible Living + Night Path.

Measure for at least one meaningful season before projecting annual energy results.

What My LuxSync Blueprint Can Include

- property type and approximate square footage;
- current technology and compatibility context;
- household priorities and recommended LuxSync Experiences;
- Essential Intelligence, Elevated Living, and Complete LuxSync Experience paths;
- room-by-room or phase-by-phase roadmap;
- validated product categories and next best action.

Important Boundaries

LuxSync does not guarantee energy savings, home-value appreciation, insurance reductions, incident prevention, or payback. Property-awareness and security-related products do not replace smoke/CO alarms, life-safety systems, emergency services, professional monitoring, or responsible home maintenance.

Next step: Find My LuxSync Solution to create your personalized Blueprint.

Your measurement log

Record observations before and after a change. Use comparable periods, consistent units, and your own measured data. Keep estimates and scenario values clearly labeled.

Property / project: _____

Period: _____ Recorded by: _____

Phase: Baseline / Pilot / Follow-up

Record your observations

Value area	Measurement / unit	Notes / evidence
Energy use	_____ _____	_____ _____
Time and convenience	_____ _____	_____ _____
Property awareness	_____ _____	_____ _____
Service simplicity	_____ _____	_____ _____
Comfort and ambience	_____ _____	_____ _____
Accessibility	_____ _____	_____ _____

Context: occupancy, weather, schedule, or equipment changes

Compare two periods

Copy recorded values side by side. This worksheet makes no automatic ROI, savings, or payback calculation. Explain differences in context before drawing conclusions.

Period A: _____ Period B: _____

Value area	Period A / unit	Period B / unit
Energy use	_____	_____
Time and convenience	_____	_____
Property awareness	_____	_____
Service simplicity	_____	_____
Comfort and ambience	_____	_____
Accessibility	_____	_____

What changed? What needs another measurement?
